Release Notes:

- 1. The current version of ProView Desktop application uses an outdated version of Chromium (version 56), which is unable to handle some cookie attributes, which is causing it to not display the login page for users to login to the application.
- 2. This patch is to install a new version of nwjs for the ProView Windows Desktop application to upgrade the ProView browser version (Chromium version to 85.0).
- 3. The installer can be pushed to client's machine and run as Administrator.
- 4. The installer requires the installation of the Proview Windows desktop application as a prerequisite.
- 5. It is recommended that the application be closed before installing the patch; however, if the application is still open, the installer will close the application and install the patch.
 - a. If the application is open, it should be connected to online.
- 6. After the patch installation, users will be able to open the ProView application and log into the application through the login screen.

Installation Instructions:

First time Patch install:

- 1. Download ProView_patch.msi
- 2. Double click on the ProView_patch.msi file
- 3. The installer will copy the files and complete the installation.

Reinstallation of Patch:

- 1. Uninstall the patch before re-installing it.
 - a. Go to Control Panel
